Brownsburg, IN 46112 | (346) 465-2440 | oamosu14@aol.com | [LinkedIn: olufemi-amosu-aba240171](https://www.linkedin.com/in/olufemi-amosu-aba240171)

PROFESSIONAL SUMMARY

Multidisciplinary DevOps and Systems Engineer with 11+ years of experience in Linux administration, IT infrastructure, cybersecurity, and cloud services. Proven expertise in deploying and supporting enterprise-scale Windows and Linux systems, enforcing secure configurations, and integrating security into DevOps pipelines (DevSecOps) to ensure compliance and resilience. I am skilled in automation, CI/CD, virtualization, and scripting to enhance reliability and operational efficiency. Hands-on with security auditing, vulnerability assessments, and access controls across hybrid environments. Committed to aligning technology with business goals through continuous improvement and cross-functional collaboration.

TECHNICAL SKILLS

- **Automation & CI/CD:** Ansible, Jenkins, GitHub, Git, SourceTree, JFrog, SonarQube
 - **Cloud Platforms:** Amazon Web Services (AWS), Microsoft Azure
 - **Containerization & Orchestration:** Docker, Kubernetes
 - **Security & Code Analysis:** OWASP ZAP, Snyk, SonarCloud
 - **Monitoring & Logging:** Nagios, Splunk, Cockpit
 - **Operating Systems:** Red Hat Enterprise Linux, Ubuntu, CentOS, Windows Server
-

CORE COMPETENCIES

- **Security-Driven DevOps & Compliance**
Expertise in integrating security into DevOps workflows, applying "defense in depth," and ensuring IT governance, auditing, and compliance (e.g., SOX, access control, incident response).
- **Automation, Orchestration & CI/CD**
Proficient in Ansible, Jenkins, Docker, and Kubernetes for automating deployments, managing configurations, and streamlining development pipelines in hybrid cloud environments.
- **Systems Administration (Linux & Windows)**
Skilled in managing and troubleshooting Linux and Windows servers, including unattended installations, patching, encryption (EFS), system recovery, file/printer/web access, and user profiles.
- **Cloud Infrastructure & Virtualization**
Hands-on experience with AWS and Azure platforms, provisioning resources, securing cloud environments, and using virtual machines for testing and sandboxing tools.
- **Networking & Infrastructure Monitoring**
Knowledgeable in TCP/IP, DNS/DHCP, VPN, IPv4/IPv6, network topologies, remote access, and monitoring tools (Nagios, Splunk) to maintain uptime and optimize performance.
- **Application & Software Lifecycle Management**
Experience in scripting, deploying applications via Windows Installer, managing version control, and supporting secure software development and testing environments.
- **Collaboration, Documentation & User Support**
Strong communication and cross-functional teamwork skills, with a focus on technical documentation, user support, and aligning infrastructure with organizational goals.

EMPLOYMENT HISTORY

Verizon – Indianapolis, IN

Sr. Engineer Spec – Network Performance

Nov 2021 – Present

- Spearheaded automation of deployment processes using Ansible and Jenkins, reducing deployment time by 30% and manual effort by 40%.
- Managed and optimized dev environments and CI/CD pipelines, resulting in a 30% improvement in system performance and 20% increase in application efficiency.
- Configured and maintained Jenkins servers to support continuous integration and delivery (CI/CD) pipelines for multiple software projects.
- Collaborated cross-functionally with development, operations, and security teams to design robust automation strategies and streamline release cycles.
- Monitored cloud environments (AWS) for privacy and security compliance, generating EC2 instance snapshots to support high-availability scaling.
- Implemented and maintained infrastructure security measures, including backup strategies, patch management, and vulnerability mitigation using tools like Snyk and SonarQube.
- Conducted real-time monitoring and health checks for applications using Nagios and Splunk, ensuring high availability and zero-downtime updates.
- Authored and maintained shell scripts and automation tools to simplify complex administrative tasks and reduce manual overhead.
- Investigated and resolved failed deployments, escalating via Jira or Slack, and tracked issues through resolution.
- Documented the end-to-end CI/CD lifecycle, producing clear and actionable reports for stakeholders and leadership.

Lennar – Houston, TX

Senior Auditor – IT Controls and Compliance

Dec 2021 – Sept 2023

- Administered and supported Windows Server environments, including Active Directory, Group Policy Objects (GPOs), and DNS/DHCP configuration.
- Managed user accounts, access control, and permissions, ensuring secure authentication and authorization practices across systems.
- Monitored system health, applied security patches, and performed routine system updates to maintain integrity and performance.
- Oversaw workstation imaging, software installation, and hardware troubleshooting for office staff and remote users.
- Implemented local and remote access controls via VPN and RDP, enforcing MFA and password policies.
- Maintained endpoint protection systems and performed regular security audits to ensure compliance with organizational standards.
- Created PowerShell scripts to automate repetitive tasks, improving IT efficiency and reducing manual errors.
- Provided Tier 2/3 technical support, resolving escalated helpdesk tickets promptly and improving user satisfaction.
- Collaborated with vendors for hardware procurement and license renewals, supporting budget and asset management.
- Documented infrastructure changes, procedures, and IT policies to support training and knowledge continuity.

Infosys Limited – Indianapolis, IN
Technology Analyst – Cloud Support

June 2020 – Dec 2021

- Supported hybrid cloud environments across Azure and AWS, implementing identity and access controls using IAM and Azure AD.
- Provisioned and maintained cloud infrastructure while actively monitoring performance metrics and applying security patches to mitigate vulnerabilities.
- Developed automation scripts for cloud deployments and enhanced logging practices to support incident response and forensic readiness.
- Diagnosed and resolved network and service-related issues; enforced change control procedures to ensure stability and compliance.

Baylor College of Medicine – Houston, TX
Linux System Analyst

June 2019 – May 2020

- Administered Linux/Windows dual-platform environments, configuring local access controls, security policies, and user permissions.
- Installed, configured, and maintained Red Hat and CentOS servers, ensuring system performance, uptime, and compliance with IT standards.
- Performed encryption tasks (EFS), data backups, and restorations using system state and recovery tools to protect critical data.
- Automated administrative tasks using shell scripting and cron jobs, including backups, patching, and log rotation.
- Provided Tier-3 support for system and network services, resolving application and hardware issues in production environments.
- Monitored server performance and availability using native tools and dashboards, proactively resolving system issues.
- Created documentation and user guides for system configurations, standard operating procedures, and incident response.
- Supported application deployment coordination and OS-level troubleshooting in collaboration with cross-functional teams.

DXC Technology – New Orleans, LA
DevOps Engineer

Feb 2019 – Oct 2019

- Collaborated with QA and security teams to assess vulnerabilities in web and application environments, integrating early security testing into CI/CD workflows.
- Built and managed virtual machines and testbeds to simulate threat scenarios and validate security tool effectiveness in sandbox environments.
- Automated infrastructure provisioning using Ansible and shell scripts to reduce manual errors and enforce consistent security configurations.
- Integrated static and dynamic code analysis tools (e.g., SonarQube, OWASP ZAP) into Jenkins pipelines for continuous security validation.

- Supported compliance initiatives by documenting pipeline workflows, secure configuration baselines, and change management logs.
- Used flowcharts and architecture diagrams to document error handling logic, pipeline processes, and deployment flows.
- Applied IAM best practices to test access control policies and verify least privilege configurations in test deployments.
- Monitored build environments and logs for anomalies and pipeline failures, resolving them in collaboration with DevSecOps teams.

Insight Tech Consulting – Houston, TX

Linux System Administrator

Aug 2016 – Jan 2019

- Installed, configured, and secured Apache and internal services across Linux and hybrid networks.
- Designed flowcharts and used diagrams to outline systems processes and access management.
- Resolved issues related to system state data and synchronized offline files for remote staff.
- Trained junior admins on Windows profile management and Group Policy deployment.

PROJECTS

- **AWS EKS Cluster Deployment:** Built highly available containerized infrastructure using Terraform, Kubernetes, and EKS.
- **CI/CD Pipeline Automation:** Automated full-cycle builds using Jenkins and GitHub Actions with integrated security testing (Snyk, SonarQube).
- **Security Monitoring Infrastructure:** Deployed Nagios XI and Splunk for live monitoring and auditing of critical services.

EDUCATION

- | | |
|--|----------|
| ▪ Postgraduate Certificate in Cloud Computing , The University of Texas at Austin | Jan 2022 |
| ▪ Postgraduate Certificate in DevOps , California Institute of Technology | Aug 2021 |
| ▪ PGD Management Studies , Ladoke Akintola University of Technology, Nigeria | Apr 2009 |
| ▪ Higher National Diploma in Computer Science , The Polytechnic Ibadan, Nigeria | Aug 2006 |

CERTIFICATIONS

- CompTIA Linux+ Certified
 - Red Hat Certified System Administrator (RHCSA)
 - Certified Information Systems Auditor (CISA)
 - Microsoft Certified: Azure Fundamentals
 - Microsoft Certified: Azure Administrator Associate
 - AWS Certified SysOps Administrator – Associate
 - AWS Certified Solutions Architect – Associate
 - Fortinet Certified Fundamentals in Cybersecurity
-
